Research Interests

I am broadly interested in understanding and improving how deep learning models learn and evolve. In particular, I aim to explore efficient and continual learning as well as the fundamental principles behind generalization and optimization, and I hope to build on this understanding to contribute to the advancement of model architectures. I am also curious about scaling laws and what drives the capabilities of large models.

Keywords: Efficient/Continual Learning, Generalization, Optimization, Model Architecture, Scaling Laws

Education

B.S., Division of AI and Computer Engineering Mar. 2021 - Feb. 2027
Kyonggi University, Suwon (GPA: 4.16 /4.5)

Publications

Experience

AI Vision Lab, Kyonggi University Jan. 2026 - Present
Undergraduate Research Student Suwon, Korea
Advisor: Prof. Junho Ahn

Military-Academia Joint Program (ITSA), ROK DCC Apr. 2026 - Jul. 2026
Teaching Assistant & Research Assistant Suwon, Korea

Projects

Domain-Specific SLM for Text-to-SPL Query Generation Apr. 2026 - Jul. 2026
ITSA & ROK DCC

- Contributed to small language model generating context-appropriate SPL queries from natural language, participating in data augmentation and model selection

Phishing Website Detection with LightGBM Mar. 2026 - Jun. 2026
Kyonggi University

- Implemented HTML parsing with rule-based scoring logic and integrated the trained model into a server

AI Chatbot Platform for ADHD Children's Routine Management Oct. 2025
2025 SW-Oriented University Joint AI Hackathon

- Developed backend infrastructure with MySQL database and server for a Flutter-based application

CodingRun: Unity-Based Game for Coding Education Mar. 2025 - Jun. 2025
Kyonggi University

- Built the game manager using the singleton pattern and integrated Google Play services (leaderboard)
-

Awards

Best Paper Award (Gold), Undergraduate Paper Competition, 2026 KIIT Summer Conference	Jun. 2026
Excellence Award , 2025 SW-Oriented University Joint AI Hackathon	Oct. 2025
Gold Award , 2025 Industry-Academia Capstone Design Competition	Jul. 2025
Best Paper Award (Bronze), Undergraduate Paper Competition, 2025 KIIT Summer Conference	Jun. 2025

Scholarships

AI & SW Talent Scholarship, Noh Youngbaek Scholarship Foundation	2026
KGU Recommendation Scholarship (Type B), Kyonggi University	Sep. 2025
Academic Improvement Scholarship, Kyonggi University	Sep. 2025
Academic Excellence Scholarship, Kyonggi University	Sep. 2024

Certifications

CSTS (Certified Software Test Specialist), Foundation Level	May 2025
TOPCIT – Level 3 (Score 540)	May 2025
PCCE (Programming Competency Certification for Everyone), Level 2	Jan. 2025

Programming Skills

Languages	Python, C/C++, C#, Java, JavaScript, R
ML Frameworks	PyTorch, Keras, TensorFlow, scikit-learn
Web/Backend	FastAPI, Flask
Tools	Unity, Git, MySQL
